**STYLUS RMX® - REALTIME GROOVE MODULE**

Stylus RMX is a completely new groove-based virtual instrument plug-in for Macintosh and Windows. Stylus RMX is the first product to offer the combined power of Groove Control™ with Spectrasonics Advanced Groove Engine (S.A.G.E.™) technology giving users dramatic new control over groove production and performance. Spectrasonics' in-house development team created the new instrument from the ground up, with dozens of new features including the ground-breaking Chaos Designer™, a completely redesigned multi-page user interface, a new core library of sounds, all with a focus on realtime groove creation and performance.
